

## GROWTH (underpinned by our values – inspiration, excellence, determination, courage)

Intent	Implementation	Impact
<p><b>To develop our children as independent and lifelong learners they will:</b></p> <ul style="list-style-type: none"><li>• Be provided with opportunities and experiences that broaden their aspirations.</li><li>• In discrete subjects, we learn about experts and people of influence, as well as what their roles entail. Children cannot aspire to things they have never encountered and role models they have not seen.</li><li>• Encourage our children to think ‘What if...’ in order to open up possibilities and critical thinking.</li><li>• Develop personal ways they learn best and independence in their learning.</li><li>• Cultivate personal wishes and dreams in all areas of their lives, including academic attainment, to take part in a range of activities to find and develop their talents and to have ambition for themselves as adults.</li><li>• Teach children to learn from their mistakes and deal/build on failures to be resilient individuals.</li></ul>	<p><b>Growth</b> objectives are implemented through a challenging curriculum where there is no ceiling applied to children as they select their practise activities and ability grouping is not a teaching strategy used unless absolutely necessary. Children are given opportunities to develop talents and skills outside of the daily academic remit through enrichment projects such as our Graduate Programme and Go Curiosity. Children are also specifically taught how to develop a growth mindset and skills of determination and resilience through assemblies, brainboost projects and modelling from adults both in academic lessons and in relationship building at break and lunchtimes.</p>	<p>The impact of successful <b>growth</b> impact will be our children being equipped with the foundations and skills to achieve success in later education and be inspired to strive for future careers, demonstrating this by talking about their hopes and dreams for the future.</p>
